

Homework 8, Week 10

Activity 16

ACTIVITY 16

Read the following thesis statements. Put a check (✓) next to each topic sentence that supports the thesis statement.

1. **Thesis statement:** I find myself growing to be a more sociable person in the International Communication Student Club.

Topic sentences:

- _____ A. I have learnt to speak more confidently through numerous calls I make to arrange lectures with guest speakers.
- _____ B. I did not like the club I joined last year.
- _____ C. I have become more outspoken when my opinions differ from others'.
- _____ D. The club president is very supportive.
- _____ E. I have made many friends in the club.

2. **Thesis statement:** The best way to reduce traffic in our city is to build a subway system.

Topic sentences:

- _____ A. Traffic accidents increased by 30 percent last year.
- _____ B. Widening the roads has not solved the problem of traffic congestion.
- _____ C. Automobiles are the major cause of pollution in our city.
- _____ D. A survey shows that 90 percent of people will take public transportation to work if there is a convenient subway system.
- _____ E. Our neighboring city has successfully solved its traffic problem with a new subway system.

3. **Thesis statement:** My city is famous for its beautiful scenery.

Topic sentences:

- _____ A. The sunset at White Sand Beach attracts many tourists all year around.
- _____ B. The restaurants near the beach serve great seafood.
- _____ C. The tree-covered hills overlook the coast from the distance.
- _____ D. The red leaves in the woods make a spectacular picture in the fall.
- _____ E. A museum of fine arts is located at the foot of the hills.

1.

- yes

- no
- yes
- no
- yes

2.

- no
- no
- no
- yes
- yes

3.

- yes
- no
- no
- yes
- no

Activity 17

ACTIVITY 17

Below are sentences in disorder from a paragraph. Reorder them for coherence by numbering the sentences from 2 to 9.

- 1 Another indication of the wolf's intelligence is the ability to communicate.
- _____ A whimper communicates friendship, snarls convey warnings and admonishments, and a special chirp-like tone expresses sexual interest.
- _____ Wolves of the highest rank reveal their position by keeping their tails and ears up and by looking directly into the eyes of other animals.
- _____ Like dogs, wolves also use gestures and facial expressions to communicate.
- _____ Frightened wolves keep their teeth covered, eyes slightly closed, and ears flat to the head.
- _____ They also bend their legs and tuck in their tails.
- _____ Wolves have their own language, which is based on the use of different intonations.
- _____ Wolves that are self-confident, on the other hand, point their ears forward and bare their teeth.
- _____ By moving their foreheads, mouths, ears, and eyes, they express their emotions and announce their rank.
- 10 Members of the pack show respect for them; like dogs, they keep their ears tucked in, their heads down, and their legs slightly bent.

1, 3, 9, 4, 6, 8, 2, 7, 5, 10

Activity 18

ACTIVITY 18

Read the following passage and identify the transitional devices that make connections between sentences. Single-underline the repeated key words and double-underline synonyms that substitute them and pronouns that refer to them. Circle the transitional words and phrases.

As a country person, I often feel that I am on the bottom end of the waste problem. I live on the Kentucky River about ten miles from its entrance into the Ohio. The Kentucky, in many ways a lovely river, receives an abundance of pollution from the eastern Kentucky coal mines and central Kentucky cities. When the river rises, it carries a continuous raft of cans, bottles, plastic jugs, chunks of styrofoam, and other

206 Writing Critically 2

imperishable trash. After the floods subside, I, like many other farmers, must pick up the trash before I can use my bottomland fields. I have seen the Ohio, whose name means "beautiful river," so choked with this manufactured filth that an ant could crawl dry-footed from Kentucky to Indiana. The air of both river valleys is seriously polluted. Our roadsides and roadside fields lie under a constant precipitation of cans, bottles, the plasticware of fast food joints, soiled plastic diapers, and sometimes whole bags of garbage. In our county we now have a "sanitary landfill" which daily receives, in addition to our local production, 50 to 60 large truckloads of garbage from Pennsylvania, New Jersey, and New York.

Text A

Ambition

Perri Klass

1. In college, my friend Beth was very ambitious, not only for herself but for her friends. She was interested in foreign relations, in travel, in going to law school. "I plan to be Secretary of

State someday,” she would say matter-of-factly. One mutual friend was studying literature, planning to go to graduate school; he would be the chairman of the Yale English Department. Another friend was interested in political journalism and would someday edit *Time* magazine. I was a biology major, which was a problem: Beth’s best friend from childhood was also studying biology, and Beth had already decided she would win the Nobel Prize. This was resolved by my interest in writing fiction. I would win that Nobel, while her other friend would win for science. **(Use the ambitions of the author and her friends as the examples to introduce the topic of ambitions with humorous words)**

2. It was a joke; we were all smart-ass college freshmen, pretending the world was ours for the asking. But it was not entirely a joke. We were smart college freshmen, and why should we limit our ambitions? **(The author expresses her confidence to ambition)**
3. I’ve always liked ambitious people, and many of my closest friends have had grandiose dreams. I like such people, not because I am desperate to be buddies with a future Secretary of State but because I find ambitious people entertaining, interesting to talk to, fun to watch. And, of course, I like such people because I am ambitious myself, and I would rather not feel apologetic about it. **(Show the author as a ambitious people also likes other ambitious people)**
4. Ambition has gotten a bad press. Back in the 17th century, Spinoza thought ambition and lust were “nothing but species of madness, although they are not enumerated among diseases.” Especially in women, ambition has often been seen as a profoundly dislikable quality; the word “ambitious” linked to a “career woman” suggested that she was ruthless, hard as nails, clawing her way to success on top of the bleeding bodies of her friends. **(Introduce the history of ambition being misunderstood in the 17th century)**
5. Then, in the late seventies and the eighties, ambition became desirable, as books with titles like *How to Stomp Your Way to Success* became bestsellers. It was still a nasty sort of attribute, but nasty attributes were good because they helped you look out for number one. **(Show a little transformation of the concept of ambition)**
6. But what I mean by ambition is dreaming big dreams, putting no limits on your expectations and your hopes. I don’t really like very specific, attainable ambitions, the kind you learn to set in the career-strategy course taught by the author of *How to Stomp Your Way to Success*. I like big ambitions that suggest that the world could open up at any time, with work and luck and determination. The next book could hit it big. The next research project could lead to something fantastic. The next bright idea could change history. **(The author’s opinion about ambition that is large rather than specific)**
7. Of course, eventually you have to stop being a freshman in college. You limit your ambitions and become more realistic, wiser about your potential, your abilities, and the number of things your life can hold. Sometimes you get close to something you wanted to do, only to find it looks better from far away. Back when I was a freshman, to tell the truth, I wanted to be Jane Goodall, go into the jungle to study monkeys and learn things no one had dreamed of. This ambition was based on an interest in biology and several *National*

Geographic television specials; it turned out that wasn't enough of a basis for a life. There were a number of other early ambitions that didn't **pan out** either. I was not fated to live a wild, adventurous life, to travel alone to all the most exotic parts of the world, to leave behind a string of broken hearts. Oh well, you have to grow up, at least a little. ***(State that the ambitions will be more realistic with our growth)***

8. One of the worst things ambition can do is tell you that you're a failure. The world is full of measuring tapes, books and articles to tell you where you should be at your age, after so-and-so many years of doing what you do. ***(Show the worst things of ambition is failure)***
9. Almost all of us have to deal with the tremendous success of friends (or enemies), with those who somehow started out where we did but are now way in front. My college-**alumni** magazine arrives every two months without fail, so I can find out who graduated two years after I did but is now running a ground-breaking clinic at a major university hospital (and I'm only just finishing my residency), who is restoring a **fabulous mansion** in a highly desirable town by the sea, and who got promoted yet again, due to natural brilliance and industry. ***(State that we need to treat the success of friends or enemies in a right way)***
10. I read an article recently about how one's twenties are the decade for deciding on a career and finishing your training, and the thirties are for consolidating your success and rising within your chosen job (and here I am in my thirties, not even sure what I want to do yet). With all these external **yardsticks**, the last thing anyone needs is an internal voice as well, whispering that you were supposed to do it better, get further and that all you've actually accomplished is mush, since you haven't met your own goals. ***(Necessary conditions for accomplishing ambitions when growing)***
11. The world is full of disappointed people. Some of them probably never had much ambition to start with; they sat back and waited for something good and felt cheated because it never happened. Some of them had very set, specific ambitions and, for one reason or another, never got what they wanted. Others got what they wanted but found it wasn't exactly what they'd expected it to be. Disappointed ambition provides **fodder** for both drama and **melodrama**: **aspiring** athletes (who could have been contenders), and aspiring dancers (all they ever needed was the music and the mirror). ***(Show the persons and results of disappointed ambitions)***
12. The world is also full of people so ambitious, so consumed by drive and overdrive that nothing they pass on the way to success has any value at all. Life becomes one long exercise in delayed **gratification**; everything you do, you're doing only because it will get you where you want to be one day. Medical training is an excellent example of delayed gratification. You spend years in medical school doing things with no obvious relationship to your future as a doctor, and then you spend years in residency, living life on a miserable schedule, staying up all night and **slogging** through the day, telling yourself that one day all this will be over. It's what you have to do to become a doctor, but it's a lousy model for life in general. There's nothing wrong with a little delayed gratification every now and then, but a job you do only because of where it will get you—and not because you like it—means a life

of muttering to yourself, “Someday this will be over.” This is bad for the **disposition**. (**Show the persons and results of filled ambitions**)

13. As you grow up, your ambitions may come into conflict. Most prominently nowadays, we have to hear about women torn between family and career, about women who make it to the top only to realize they left their most precious things behind. Part of growing up, of course, is realizing that there is only so much room in one life, whether you are male or female. You can do one thing wholeheartedly and single-mindedly and give up some other things. Or you can be greedy and grab something new without wanting to give up what you already have. This leads to a chaotic and crowded life in which you are always late, always overdue, always behind, but rarely bored. Even so, you have to come to terms with limitations: you cannot crowd your life with occupations and then expect to do each one as well as you might if it were all you had to do. I realize this when I race out of the hospital, offending a senior doctor who had offered to explain something to me, only to arrive late at the daycare center, annoying the people who have been taking care of my daughter. (**Utter how to confront the conflict of our ambitions when growing up**)
14. People consumed by ambition, living with ambition, become a little humorless and a little one-sided. On the other hand, people who completely **abrogate** their ambition aren’t all fun and games either. I’ve met a certain number of women whose ambitions are no longer for themselves at all; their lives are now dedicated to their offspring. I hope my children grow up to be nice people, smart people, people who use good grammar; and I hope they grow up to find things they love to do, and do well. But my ambitions are still for me. (**The negative effect of ambitions to people's personality**)
15. Of course, I try to be mature about it all. I don’t assign my friends Nobel Prizes or top government posts. I don’t pretend that there is room in my life for any and every kind of ambition I can imagine. Instead, I say **piously** that all I want are three things: I want to write as well as I can, I want to have a family, and I want to be a good **pediatrician**. And then, of course, a voice inside whispers: to write a bestseller, to have ten children, to do stunning medical research... Fame and fortune, it whispers, fame and fortune... Even though I’m not a college freshman anymore, I’m glad to find that little voice still there, whispering sweet nothings in my ear. (**Introduce the author's own ambitions and her goal to be mature about it**)

doctor

Topic Idea

This article introduces the ambitions in detail by show its origin, its characters and so on and appeals to readers to treat their ambitions rightly.

Structure

Text A 1st

Activity 2

Task I

1. The author uses extended definition of ambitions, from different aspects including the origin, the history, the characters and the effects of it.
 2. To make the language more humorous and grab readers' attention. It is helpful in illustrating her definition because the example makes the definition more specific and easy to understand.
 3. She tries to explain the importance of ambitions of women, uses her own experience to appeal to these readers and transform their opinions rather than ignoring the readers.
 4. The technique makes the structure of the article more tight and can make readers recall the examples in the opening paragraph to deepen their memory about the definition of ambitions.
-

Task II

Pattern of development	Paragraphs	How it helps to define "ambition"
Exemplification	1, 2, 3, 4, 7, 8, 9, 10, 13, 15	make the "ambitions" more specific and help the readers to understand
Classification	11, 12	make the structure of article more tight and more clear
Comparison and contrast	5, 6, 14	highlight the differences and commons of "ambitions"

Activity 5

Read the following passage and complete the tasks below.

The fear of Americanization of the planet is more ideological paranoia than reality. There is no doubt, of course, that with globalization, English has become the general language of our time, as was Latin in the Middle Ages. And it will continue its ascent, since it is an indispensable instrument for international transactions and communication. But does this mean that English necessarily develops at the expense of the other great languages? Absolutely not. In fact, the opposite is true. The vanishing of borders and an increasingly interdependent world have created incentives for new generations to learn and assimilate to other cultures, not merely

as a hobby but also out of necessity, since the ability to speak several languages and navigate comfortably in different cultures has become crucial for professional success. Consider the case of Spanish. Half a century ago, Spanish speakers were an inward-looking community, who projected themselves in only very limited ways beyond their traditional linguistic confines. Today, Spanish is dynamic and thriving, gaining beachheads or even vast landholdings on all five continents. The fact that

explains why the two US presidential candidates, Texas Governor George W. Bush and Vice President Al Gore, campaigned not only in English but also in Spanish.

Task 1 Choose the proper function the following sentences play in the text.

A. Exemplification B. Comparison and contrast C. Topic sentence D. Transition

1. The fear of Americanization of the planet is more ideological paranoia than reality. ()
2. But does this mean that English necessarily develops at the expense of the other great languages? Absolutely not. ()
3. Consider the case of Spanish. Half a century ago, Spanish speakers were an inward-looking community, who projected themselves in only very limited ways beyond their traditional linguistic confines. Today, Spanish is dynamic and thriving, gaining beachheads or even vast landholdings on all five continents. ()

Task I

1. C
2. D
3. A

Task 3 What is the exact meaning of “ideological paranoia” in the first sentence of this passage? Please write a definition for this term.

Task III

Ideological paranoia is a phenomenon that a language popularizes around the world but undermines other languages.

Task 6 Choose the best answer to complete the blank in the passage.

- A. Spain and the United States used to compete fiercely in the Americas for their respective interests
- B. there are some 25 to 30 million Spanish speakers in the United States today
- C. US leaders are very competent in language learning
- D. Spanish speakers are posing an increasing threat to the United States

Task 7 Identify the cause and effect according to the passage.

Cause	Effect
	English has become the general language in our time.
English is an indispensable instrument for international transactions and communication.	
	The new generations have incentives to learn and assimilate to other cultures.
Spanish is dynamic and thriving in the US today.	

Task VI

B

Task VII

Cause	Effect
The globalization grows up.	English has become the general language in our time.
English is an indispensable instrument for international transactions and communication.	English will continue its ascent.
The vanishing of borders and increasingly interdependent world.	The new generations have incentives to learn and assimilate to other cultures.
Spanish is dynamic and thriving in the US today.	Two US presidential candidates campaigned not only in English but also in

Cause	Effect
	Spanish.

Text A

Globalization: A Culture Killer

Ramzy Baroud

1. A family sits across from me in a cafe, in a largely conservative Asian country. An older woman shyly **hunches** over, desperately trying to avoid eye contact with the giant-screen TV blazing loud music on MTV. The **scantily** dressed presenter introduces her “top song” for the week. Beyonce, dressed in very little, **reiterates** that she is a “single lady.” ***(Take the older woman in the family as a example to introduce the following topic)***
2. The old woman’s son is **mesmerized** by what he sees. He pays no attention to his mother, young wife or even his own son who wreaks **havoc** in the coffee shop. The man’s T-shirt reads: “What the hell are you looking at?” ***(Show the reactions of other family members)***
3. Respecting the message on his T-shirt, I try to keep to myself, but find it increasingly difficult. The wife is completely covered, old fashioned. ***(My attitude to the scene)***
4. The contradictions are **ample**, overwhelming even. The **attire** of the family, the attitude of the ladies and even of the man with the provocative T-shirt are all signs of the cultural schizophrenia that **permeates** many societies in the so-called Third World. It’s a side effect of globalization that few wish to talk about. ***(Reveal the essence of the phenomenon is the effect of globalization)***
5. It’s almost always about trade, foreign investment, capital flow and all the rest. But what about culture, identity, traditions and ways of life; do these things amount to anything? ***(Introduce the question about the globalization of cultures)***
6. True, globalization has various **manifestations**. If viewed strictly from economic terms, then the debate **delves** into trade barriers, protectionism and tariffs. Powerful countries demand that smaller countries break down all trade barriers, while maintaining a level of protectionism over their own. Smaller countries, knowing that they cannot do much to hide from the hegemonic nature of globalization, form their own economic clubs, hoping to negotiate fairer deals. And the economic **tug** of war continues, between diplomacy and threats, dialogue and arm twisting. ***(Show the negative manifestations about economic terms of the globalization in detail)***
7. This is the side of globalization with which most of us are familiar. But there is another side of globalization, one that is similarly **detrimental** to some countries, and profitable to others:

cultural globalization—not necessarily the domination of a specific culture, in this case Western culture, over all the rest—but rather the unbridgeable disadvantage of poorer countries, who lack the means to withstand the unmitigated takeover of their traditional ways of life by the dazzling, well-packaged and branded “culture” imported upon them around the clock. ***(Introduce the negative effects of globalization about cultures to poor countries)***

8. What audiences watch, read and listen to in most countries outside the Western hemisphere is not truly Western culture in the strict definition of the term, of course. It’s a selective brand of a culture, a reductionist presentation of art, entertainment, news, and so on, as platforms to promote ideas that would ultimately sell products. ***(Utter the true goal of the not truly Western cultures to sell products)***
9. For the **dwarfed** representation of Western culture, it’s all about things, tangible material values that can be obtained by that simple and final act of pulling out one’s credit card. To sell a product, however, media also sell ideas, often one-sided, and create unjustifiable fascinations with ways of life that hardly represent natural progression for many vanishing cultures and communities around the world. ***(Explain in detail about the negative effects of the western culture)***
10. Recently in some Asian country, a few teenagers turned an Internet cafe into a shouting match as they engaged one another in some violent computer games. I desperately tried to mind my own business, but their **shrieks** of victory and defeat were deafening. “Kill the terrorists,” one of them yelled in English, with a thick accent. The “Rs” in “terrorists” rolled over his tongue so unnaturally. For a moment, he was an “American,” killing “terrorists,” who, **bizarrely**, looked more Asian than American. As I walked out, I glanced at the screen. Among the **ruddle**, there was an Asian temple, or what was left of it. The young boy was congratulated by his friends for his handy work. ***(Take the Asian boy as a example to show the negative aspects of western culture)***
11. There is nothing wrong with exchanges of ideas, of course. Cultural interactions are historically responsible for much of the great advancements and evolution in art, science, language, even food and much more. But, prior to globalization, cultural influences were introduced at much slower speed. It allowed societies, big and small, to reflect, consider, and adjust to these unique notions over time. But the globalization of the media is unfair. It gives no chance for mulling anything over, for determining the benefits or the harms, for any sort of value analysis. News, music and even pornography are beamed directly to all sorts of screens and gadgets. When Beyonce sings she is a “single lady,” the whole world must know, instantly. This may sound like a harmless act, but the cultural contradictions eventually **morph** into conflicts and clashes, in figurative and real senses. More, it makes little sense, for example, that Asian audiences are consumers of Fox News and Sky News, while both are regarded as right-wing media platforms in their original markets. And what can an Asian television do to control media **moguls** and morphing media empires all around? Young people grow, defining themselves according to someone else’s standards,

thus that Asian teenager, temporarily adopting the role of the “American,” blows up his own cultural place. ***(Contrast the difference between the normal cultural interactions with the globalization and emphasize the negative effect of cultural globalization)***

12. Globalization is not a fair game, of course. Those with giant economies get the lion’s share of the “collective” decision-making. Those with more money and global outlook tend to have influential media, also with global outlook. In both scenarios, small countries are lost between desperately trying to negotiate a better economic standing for themselves, while hopelessly trying to maintain their cultural identity, which defined their people, generation after generation throughout history. ***(Further emphasize the unfair of globalization)***
13. The Asian family eventually left the coffee shop. The husband watched MTV throughout his stay; the young wife clicked endlessly on her iPhone, and the older woman glanced at the TV from time to time, and then quickly looked the other way. Once is certain that a few years ago, that family would have enjoyed an entirely different experience. Alas, a few years from today, they might not even sit at the same table. ***(Return to the family and lead to readers' thinking)***

Topic Idea

This article emphasizes the globalization leads to not only the economical unfair but also the destruction of cultures and thinks of the future of global cultures.

Structure

Text A 2nd

Activity 2

Task I

ACTIVITY 2

Task 1 Think critically about the writing techniques used in Text A and discuss the following questions in groups.

1. How does Baroud introduce his topic? Is this way of introduction effective? Why or why not?
2. What is the topic sentence of Paragraph 4? Do you think it is well supported? Why or why not?
3. Baroud claims that what is exported into Asian societies is a “reductionist” or “dwarfed” representation of Western culture. What examples does he provide to support this claim? Do you agree or disagree? Can you find counter examples to challenge this claim?
4. In Paragraph 10, some teenagers playing computer games are presented as an example. What point does it try to exemplify? Is this example well chosen to support that point? Why or why not?
5. With what patterns of development does Baroud develop his point that globalization is not a fair game?

1. Use a specific example of a Asian family to introduce the topic. It is effective because it makes the concept of cultural globalization more specific and more understanding.
2. The last sentence of this paragraph. It is well supported since the former sentences are the specific examples of the topic sentence and make it more convincing.
3. The accent of the Asian teenagers speaking English and the sings of Beyonce. I agree with that since the cultures coming from other countries aim at transforming the outlook of them.
4. It tries to show that the negative effects of the western culture. It is well chosen to support the point since it specifies the point and make it more convincing.
5. Exemplification, contrast.
